

Page 1 Reactivating S-pushTAN

Reactivating S-pushTAN account

- You have a new smartphone.
- Your pushTAN account was reset, because you entered the password incorrectly.

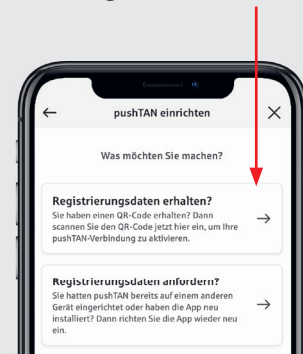

We will show you how you can reactivate the pushTAN account.

- 1** Download the S-pushTAN app from the App Store or from the Google Play Store, open it, and click on „Jetzt einrichten“.

- 2** Click on „Registrierungsdaten anfordern“.

- 3** Generate a password and confirm it. The password must consist of at least 8 characters (including numbers, letters, and a special character).

- 4** In the next step, you can decide whether you would like to unlock the app with the aid of a biometric feature or the password. Confirm your choice as appropriate.

- 5** Click on „Weiter“ and allow the app to send you notifications. You will be informed as soon as a transaction is authorized.

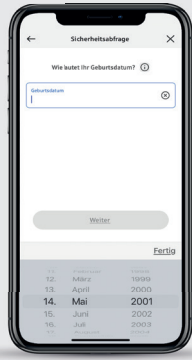

- 6** Enter the name, bank routing code, or BIC of our institution. Select your institution and click on „Weiter“.

7 Now, you will be asked to enter your login name and the online banking PIN. Fill out the respective fields and click on „Anmelden“.

8 Now, there will be two security questions (date of birth and the card number of your Sparkassen-Card). Fill this out and then click on „Weiter“.

9 In order to ultimately activate the account, request your registration letter via postal service. (Postal service takes several workdays.)

10 As soon as you have received the letter, scan the QR-Code with the camera and your account is activated again. The S-pushTAN app has now been successfully set up!
